College Corner Gettysburg College (Gettysburg, PA)

Gettysburg College is a residential, undergraduate college of the liberal arts and sciences that prepares students from across the nation and around the globe to pursue lives of personal and professional fulfillment and to engage the complex questions of our time through effective leadership and socially responsible citizenship. The power of a liberal arts education to help students develop critical thinking skills, broad vision, effective communication, a sense of the inter-relatedness of all knowledge, sensitivity to the human condition, and a global perspective, all necessary to enable students to realize their full potential for responsible citizenship

All students select a major area of focus—or even create their own—to study in depth, while also taking classes across an array of disciplines to enhance their perspective, make unforeseen connections, and discover new possibilities. Enrolling in a liberal arts and sciences institution allows you to challenge yourself. It's about developing an agile mind capable of solving complex problems—and a heart that aspires to do so. With more than 120 clubs and organizations, it is easy to get involved. All are run by students, and create more than 1,000 leadership opportunities.
